

Tabitha Deck Replacement

We have an urgent need to replace the upper deck of Tabitha. The deck has become a significant safety concern, and the replacement must be completed in the fall of 2026. Without this repair, Tabitha will no longer be able to be used.

After consulting a local contractor, we have received an estimate of \$49,000 to replace the deck. We are working diligently to gather the necessary funds, but we would greatly appreciate God's provision through the generosity of others. Additional support for this project will help ensure that this unexpected expense does not impact other important ministry opportunities or our ability to maintain staffing through the winter months
