

Bunk Bed Update Daniel

The ARC wants to replace the original 1950's bunk beds. These bunks do not meet current safety standards and are starting to show critical structure damage from years of service. New units will bring us up to current state and federal safety standards, provide a better surface to rest on and add an updated look to the lodging rooms.

Cost to acquire enough units to update Daniel will cost \$61,600.

A bunk bed pictured below costs \$1100.00 plus shipping.

Thank you for your prayerful consideration of this proposal.
