## MINISTRY VANS FOR FLBC

FLBC currently has several passenger vans that range in mileage from 200,000 to approximately 260,000 miles. They are used year round but they are heavily used during the summer months when our summer teams go out to our AFLC Churches around the US. The Bible College needs to start replacing them one at a time before major repair costs are incurred or safety compromised.

### **3.5L EcoBoost® V6**

The EcoBoost engine is amazingly power-efficient. Displacing 3.5 liters, the EcoBoost generates 310 horsepower and best-in-class gas 400 lb.-ft. of torque. Direct injection (DI) delivers a precise, fine mist of fuel directly into each cylinder, unlike conventional port fuel Injection that sprays into the intake system. DI is designed to extract as much power as possible from every drop of fuel. Turbochargers kick in on demand to provide a surge of responsive power when needed. The 3.5L EcoBoost V6 uses two small turbochargers that spool up to their operating speeds quickly.

The cost of a new van to replace one of the old ones will be about \$50,000.00. Please pray about what the Lord may lead you to do. God bless.
