

GOLF CARTS FOR HOUSEKEEPING AND TRANSPORTING PEOPLE

The ARC has thousands of campers that use their facilities each year which in turn makes work for the housekeeping staff and at time moving people from one location to another. The ARC could use four gas powered golf carts to aid in this process.

We need two of these carts could like the one below which would greatly aide the housekeeping staff. This will allow housekeeping to transport linens to and from the 640 beds easier. These two carts will shorten the time it takes for them to transport linens back and forth from the laundry to the rooms.

The ARC needs two of the carts like the one pictured above which is designed for transporting people from one place to another. The ARC does not need new ones but if they were to buy new ones they would cost about \$13,000.00 each.

To purchase four carts, two for housekeeping and two for transporting people, the total cost for these carts would be \$52,000.00.

Please pray that the Lord would supply this need either through funds to buy carts or from donors who may have very good carts that they may want to donate.

Thanks you for your support of the ARC and may God richly bless you.
