### Computer Replacement

Technology is ever changing in our world today. While we strive to provide the best service with the tools we have there are times when updates are necessary.

Recently it was brought to our attention that because the three computers we use in our office are older, they would not be able to support a required update to their operating systems. This meant we were faced with the need to replace all of our computers.

The AFLC IT department was able to find and recommend good quality, refurbished computers, at a decent price, that would allow us to move forward with the required updates and continue with our normal work. However, the cost for replacing three computers, even ones that are affordably priced, is not a small one.

Would you be willing to prayerfully consider giving toward the purchase of our replaced computers? **The total cost for all three computers is \$1,195.50.**
